PROFESSIONAL PROFILE

Engineering professional with extensive experience in gas pipeline, compressor station and underground gas storage projects, from design and FEED to construction support, commissioning and operational documentation. Coordinate design institutes, contractors and suppliers; review technical documentation, RFQ packages and engineering interfaces; track deadlines, changes and actions. Combine AutoCAD and SolidWorks experience with practical Excel and Python automation to improve document traceability and reporting.

PROFESSIONAL EXPERIENCE

Chief Engineering expert in the Planning, Monitoring, and Reporting Group

COMITA TECHNICS D.O.O.

Belgrade, Serbia | Aug 2025 - Present

- Coordinate engineering activities across the client, design institutes, subcontractors, suppliers and internal teams for gas infrastructure and underground gas storage projects.
- Review and align project documentation; monitor deadlines, open technical questions, design interfaces and follow-up actions from coordination meetings.
- Prepare and coordinate technical RFQ packages, supplier clarifications and vendor documentation reviews.
- Developed internal Python/Django tools for meeting minutes, issue and action tracking, document processing and automated XLSX reporting.
- Automated post-review distribution of maintenance reports using predefined routing rules: processing a batch of approximately 100 reports reduced from 29 minutes to 5-10 seconds.

Chief Engineering expert in the Project Management Department

INFRASTRUCTURE DEVELOPMENT AND CONSTRUCTION D.O.O. (IDC D.O.O.)

Belgrade, Serbia | Mar 2022 - Aug 2025

- Provided technical support for project and operational documentation for a main gas pipeline, associated facilities and a compressor station, including pre-commissioning and commissioning documentation.
- Developed equipment-maintenance checklists based on manufacturer documentation.
- Reviewed and verified subcontractor reports, maintained statistics and tracked recurring maintenance issues.
- Analysed equipment operating and condition data and prepared technical conclusions.
- Prepared technical justifications and visual analytical reports to support the legal department in disputes, claims and counterclaims relating to the EPC contract.
- Updated as-built documentation and distributed revisions to relevant stakeholders.
- Automated data processing, documentation comment sheets and reporting using Python and Microsoft Office tools.

PROFESSIONAL EXPERIENCE - CONTINUED

Chief Engineering Expert in the Project Implementation Department

INFRASTRUCTURE DEVELOPMENT AND CONSTRUCTION D.O.O. (IDC D.O.O.)

Belgrade, Serbia | Mar 2019 - Mar 2022

- Coordinated delivery of a compressor station and a 400 km main gas pipeline section, monitoring schedules, budgets and project milestones.
- Coordinated FEED and detailed design documentation, design-institute interfaces and Serbian approval documentation (PGD/PZI/PIO).
- Coordinated RFQ and procurement packages, technical clarifications and interfaces with 30+ suppliers, contractors and client teams.
- Supported construction, redlines and as-built documentation; participated in HAZOP reviews and preparation of PED, ATEX, Ex and CE compliance documentation.
- Automated MDR/MDI register control using Excel VBA and Python: 3,000-5,000 pipeline rows and approximately 3,000 compressor-station rows.

Career Break

Donetsk | Sep 2017 - Mar 2019

Worked on personal entrepreneurial initiatives.

Junior Project Coordinator (Chief Specialist in Project Design and Survey Works Management)

GAZPROM INVEST LTD.

St. Petersburg, Russian Federation | Sep 2015 - Sep 2017

- Supported planning, schedule coordination, cost-estimate reviews and contractor reporting across large gas infrastructure projects.
- Maintained technical correspondence, tracked contractual deliverables and recorded meeting decisions and follow-up actions.

Lead Design Engineer for Pipeline Systems

KUBANVODPROEKT JSC

Krasnodar, Russian Federation | Oct 2014 - Sep 2015

- Helped establish a pipeline design department; managed a team of design engineers, assigned tasks and controlled deadlines.
- Prepared design documentation, specifications and calculations; reviewed engineering solutions and resolved technical questions with clients and inspectors.

YUZHNIIGIPROGAZ

Donetsk, Ukraine | Aug 2006 - Oct 2014

Lead Design Engineer for Pipeline Systems | Oct 2013 - Oct 2014

Lead Design Engineer for Pipeline Systems | Oct 2008 - Oct 2013

Design Engineer for Pipeline Systems | Aug 2006 - Oct 2008

- Designed pipeline, gas terminal and facility systems; coordinated disciplines and supported site/author supervision.
- Projects included South Stream, Bovanenkovo-Ukhta, Achimov/Urengoy, Orenburgskoe BCS-1,2, Dzuarikau-Tskhinval and the South-Russian field.
- Introduced SolidWorks 3D design in 2006 and a dynamic piping-component database to automate drawings and specifications for AutoCAD.

EDUCATION & RECOGNITION IN SERBIA

Donetsk National Technical University, Donetsk, Ukraine | 2001 - 2006

Specialist Diploma, issued 30 June 2006.

Programme: Equipment for Chemical Production and Building Materials Enterprises.

Recognized in Serbia for employment as a second-cycle master's academic studies diploma (300 ESPB); field: civil engineering; NOKS level 7.1.

Educational-scientific field: technical and technological sciences.

Agencija za kvalifikacije Republike Srbije, decision dated 28 August 2024.

ENGINEERING SKILLS & TOOLS

Engineering delivery: FEED and detailed design; gas pipelines, compressor stations and UGS; RFQ and vendor documents; technical interfaces, revisions and MDR/MDI; construction and as-built support.

Tools and automation: AutoCAD, SolidWorks, KOMPAS-3D; Excel, Power Query and VBA; Python, pandas, openpyxl and Django for document processing, data analysis and reporting.

CERTIFICATIONS

- NDT Level 2 - Visual Testing (VT), UNI EN ISO 9712:2022 | Bureau Veritas Italia S.p.A. | Issued 27 Jun 2024; expiry 26 Jun 2029.
- Google Project Management Professional Certificate | Google / Coursera | 10 May 2026.
- IBM Data Analyst Professional Certificate | IBM / Coursera | 25 Feb 2024.

SELECTED COMPLETED SPECIALIZATIONS

- Project Management Principles and Practices Specialization | University of California, Irvine / Coursera | 18 Jun 2024.
- AI Agent Developer Specialization | Vanderbilt University / Coursera | 17 May 2026.

PROFESSIONAL TRAINING

- Transmission Gas Pipeline Operation and Maintenance: Technological and Safety Aspects | University of Belgrade, Faculty of Mechanical Engineering | 17-19 Apr 2024.
- Installation and Maintenance of Equipment and Installations in Explosive Atmospheres - Safety Training | Institut za preventivu, Novi Sad | Oct 2024.
- Maintenance and Repair of Gas Analytical Equipment - Manufacturer Practical Seminar | NTF BAKS LLC | Sep 2023.

LANGUAGES

Russian and Ukrainian: native. Serbian: working communication, including project meetings.

English: elementary, sufficient for working with technical documentation.
